Education

London School of Economics and Political Science (LSE) Sep 2025 – Dec 2026 (expected)

Master's studies in Social Anthropology

Selected coursework: Psychological Anthropology (Distinction), Anthropology of Religion (Distinction), Digital Anthropology, Anthropological Research Methods.

Communication University of China Sep 2021 – Jul 2025

Bachelor's degree in Communication

GPA: 3.87/4.0; ranked 1/56. **Honors:** National Scholarship.
Selected coursework: Global Communication, Data Visualization, Statistics, Digital Media Marketing Strategy.

Experience

Alibaba | Qwen Jun 2026 – Present

AI Creative Product Intern | Agents

Qwen Create Agent Teams

Developed capabilities for a multi-agent system supporting video creation, including short-form storytelling and commerce content.

- **Skill evaluation.** Built layered test sets, evaluation criteria, and an automated execution platform to improve the consistency and efficiency of manual reviews. Created test instructions tailored to each Skill's capabilities and use cases; compared no-Skill baselines and Skill versions under fixed model and tool conditions. Evaluated individual steps and end-to-end results, using tool-call traces to locate failures. The platform launched internally and covers **100+ Skills** and their versions.
- **Skill creation and author onboarding.** Helped launch an agent that converts canvas nodes, connections, inputs, outputs, and parameters into editable Skill drafts. Used multimodal understanding to break down shot structure, assets, and creative choices, supporting **50+ reusable Skills**. Prepared creator guidance, submission standards, and reference packs for external authors.
- **Storytelling workflows.** Built a specialized Agent Team around creator needs and narrative structure. Defined structured handoffs, review checkpoints, targeted rework, and retry limits; iterated on context gaps and inconsistent outputs between stages.
- **Runtime optimization.** Separated information needed for later steps from compressible conversation and tool-call history. Designed a subagent to summarize that history, reducing total token usage on long tasks by **5%**.
- **New model adaptation and testing.** Adapted Skill interfaces and model routing for Wan 3.0 and Qwen Image 3.0. Coordinated **30 comparative test cases** with creators during Wan 3.0 testing, documenting strengths and priority issues. Used off-peak scheduling and task prioritization during generation bottlenecks; participating creators published **1,200+ pieces of content** during the wider rollout.

Overseas Market Research and Growth Features

- **Market and product evaluation.** Compared organic traffic, regional purchasing power, and acquisition costs to help identify North America as the initial market. Participated in evaluations for North American and Latin American marketing scenarios; authored the analysis of intent understanding, scripts, visuals, and editing to identify suitable use cases and capability limits.
- **SEO research and feature selection.** Prioritized background removal and AI face swap using search demand and conversion potential. Identified features popular in China with limited North American search demand and stronger potential as display-ad creative. Worked with product and growth teams on feature development and campaign direction; the beta recorded **18% weekly user growth** during the teams' rollout.

Experience Continued

Xiaohongshu | Pugongying Feb – Jun 2024

Brand and Creator Product Intern | Commercial Product Strategy

- **Creator search and matching.** Contributed to creator-tag reviews, including periodic and time-sensitive labels. Analyzed search results and collaboration cases to identify matching gaps, reviewed failure cases, and tracked A/B experiments. Search CTR was **21% vs. 18%**; post-search order conversion was **4.4% vs. 4.0%**, comparing experiment and control groups.
- **Collaboration product improvements.** Analyzed client budgets, transaction limits, and existing workflows. Tested rule boundaries and risks before helping productize negotiated minimum prices, larger collaboration capacity, custom timing, and targeted creator invitations. Supported client demand worth **RMB 3 million+**; the number of collaborating creators grew **135%**.
- **Creator opportunities.** Organized creator supply and brand matching through 618 Spark Gala and home-renovation creator recruitment. Campaign orders grew **25% month over month**. Recommended creators represented **2%** of the pool and contributed **11%** of order value; **400+ creators** received their first brand deal.

Publicis Groupe Aug – Nov 2023

Brand Operations Intern

- **Digital product proposals.** Designed digital features and conducted social media analysis for Changi Airport's China proposal. Used Chinese users' mobile-platform habits and overseas shopping behavior to propose platform-based touchpoints; recommendations were adopted by the project strategist.
- **Marketing content.** Developed creator communication strategies and filmed and edited campaign content. Published videos generated **1M+ impressions** and **150K+ interactions** on Douyin. Audience-selection and video-content approaches were reused in subsequent brand proposals.

Projects and Creative Work

Creator Research and Writing Assistant Independent project

Built with LangGraph

- Developed a multi-agent system for creators with a few successful posts but no repeatable approach. Used account history and reader feedback to identify effective topics, content structures, and audiences. Derived audience profiles from follower behavior and coordinated agents to simulate responses and discuss drafts. An initial trial across **3 accounts and 20+ posts** saw approximately **18% higher average readership**.

China Open International content operations

- Communicated with players and international media teams in English, including interviews with Zheng Qinwen and Jannik Sinner. Planned, edited, and published **60+ social posts** across international and Chinese platforms. Received the news-center operations team's **Gold Award (top 5%)**.

Film and Theatre Directing and content production

- Directed *Forbidden Topics*, one of five films selected in Apple's China creative camp; won **Best Original Story** in the Apple × Shanghai Theatre Academy student short-film competition. Featured on Apple's official Douyin and WeChat accounts, with coverage from Phoenix and other media; **100K+ views**. Led CUC's Baiyang Drama Club and contributed to a production recognized at the Prism Theatre Festival.

Awards and Additional Information

- **Selected awards (2023).** First Prize, Beijing Cultural and Creative Design Competition; used Stable Diffusion and ControlNet for visual assets. National Excellence Award, university student advertising art competition. Municipal First Prize, Challenge Cup social-governance research track.
- **Personal publishing.** Xiaohongshu account @QSheep: **1.5K followers**, **7K+ likes and saves**, and **1.4K likes** on the most-liked post. Write about overseas study and personal choices.
- **English.** IELTS **7.0** overall; Speaking **7.0**. Experience conducting interviews and coordinating content work in English.
